ABOUT ME

I am Muhammad Haris Azmi, an Informatics student with a strong dedication to the field of technology. I have a keen interest in programming and system development, and I am committed to continuously enhancing my technical and analytical skills to deliver effective and impactful solutions.

EDUCATION

Telkom University | 2023 – 2027 (Expected)

S1 Informatika IPK: 3.13 out of 4

Focused on System Analysis and Software Engineering. Experienced in designing information systems, IT project management, and bridging business needs with technological solutions through efficient technical documentation.

ORGANIZATION EXPERIENCE

Head of Human Resource Development (PSDM) | Badan Mentoring, Telkom University | 2025 – Now

- Led and managed a team of 7 department members in developing cadre development strategies and human resource initiatives for mentors and mentees across the university.
- Designed development programs to enhance the quality of students' character building and academic mentoring through intensive team coordination.

Media Team Member (FKSB) | Badan Mentoring, Telkom University | 2024 – 2025

- Collaborated within a team of 7 members to manage publication strategies, social media content, and documentation of all mentoring activities within the Faculty of Communication and Business.

KDRP Team Member | LDK Al-Fath, Telkom University | 2024 - 2025

- Actively contributed alongside a team of 16 members in the Dakwah Cadre Development and Civilization House division to strengthen the organizational structure through the planning of student character development programs.

PROJECT EXPERIENCE

Swara Warga: Multimodal AI-Based Public Complaint System

- UI/UX Designer, Mobile Developer, System Analyst & Documentation
- Tools: Figma, Flutter, Python, Gemini AI, Git
- Collaborated within a team of 5 to analyze and produce technical documentation for public complaint system integration.
- Designed intuitive UI/UX and developed a multimodal AI-powered mobile application supporting reporting via text, images, and audio.
- Implemented real-time automated classification to route reports to relevant government agencies.

BudgetTrip Simulation: Budget Travel Planning Platform

- Web Programmer & UI/UX Designer
- Tools: Figma, HTML/CSS, JavaScript, PHP (Laravel)
- Collaborated within a team of 5 to design and develop a web-based travel simulation platform based on user-defined budgets.
- Developed an automated cost estimation algorithm covering transportation, accommodation, and daily expenses.

SKILLS

- HTML & CSS
- JavaScript
- Python
- Team Leadership
- Bootstrap 5
- Adobe Premiere / CapCut
- Social Media Strategy
